MEMORANDUM FOR: Director of Training

FROM :

[REDACTED]  
Intelligence Training Branch, Intelligence  
Institute

SUBJECT : Course Report, Intelligence Process  
Course No. 3-76, 19 April - 21 May 1976

The full-time Intelligence Process Course (IPC - Tab A) successfully concluded on Friday, 21 May, with no serious administrative problems encountered during its five weeks of operation. The stated objectives of the course were met in the view of the course managers. The major disappointment for the students was the strict new regulation of the Joint Chiefs of Staff that ruled out a visit to the National Military Command Center. On the positive side, the class members were greatly impressed by the openness and frankness of House Minority Leader John Rhodes who spent a half hour during the final week of the class discussing his view of intelligence and its importance to the Congress. Student reaction to the intelligence case studies presented by the various production offices (Tab B) was positive throughout the course.

1. Student Participation

The members of IPC 3-76 were enthusiastic and attentive from the beginning to the end of the course. The quality of discussions with guest speakers was uniformly high. Several of the offices the class visited have sent back word that the office participants were impressed with the quality and thoughtfulness of the students' questions. Student spirit and cohesion was good from the start even though the range of experience of the class was quite broad (Tab C). Student cooperation with the course managers was excellent throughout the five weeks. This is the first class we have worked with that was uniformly on time, particularly gratifying when traveling by bus to other CIA components and agencies of the National Foreign Intelligence Board.

Approved For Release 2002/11/04 : CIA-RDP80-00503A000100070001-3

Student performance in the writing and briefing exercises was of good quality and the group was serious about its work. There was a high level of cooperation with the Intelligence Training Branch instructors managing these particular exercises, [REDACTED]

25X1A

The students demonstrated on one occasion just how attuned the "younger generation" is to computers. During the two-day group writing exercise, one subgroup composed their report on a terminal in OTR's Information Science Training Branch, and then submitted a subsequent print-out instead of retyping the report by hand.

This session of the course again gained an extra dividend from the mixing of Career Trainees (11 of the 21 class members) and direct-hire professionals (both those relatively new to the Agency and those upgraded to professional status after some years of service). There was a good deal of informal learning by students from students over the entire length of the five weeks.

## 2. Student Evaluation (Tab D)

Students found the course effective, well-balanced, and helpful. Several stated an intent to recommend it to others. One, who had initial doubts about its value, described it in the evaluation as a "highlight" of his first year in the Agency.

The students almost uniformly found the writing and briefing exercises to be useful and worthwhile. The visits to other intelligence collectors and producers in the community, to Capitol Hill, and the White House were valued by almost all of the students.

As part of the evaluation form, students were asked to mark on an ascending scale of 1 to 7 the degree to which they felt the course met its objectives. The ratings ranged from 5 to 7 with an average of 6.3. The eleven Career Trainees rated the course at 6.2. (Four gave the course a 7, three gave it a 6, one a 6.5, one a 5.5, and two a 5.) This level of rating mirrors the experience of the previous IPC, when the CTs as a group also rated the course slightly lower than the overall average. This time the two lowest ratings were given by CTs, both destined for the Operations Directorate.

### 3. Student Observations and Suggestions

Criticism by some students of a few presentations tended to be canceled by praise from others, reflecting the differing backgrounds and expectations of the class members. The National Security Agency (NSA) and the other Defense Department briefings, however, brought the usual comments about too many charts and too much emphasis on organization at the expense of descriptions of the work performed by those organizations.

A few students believed too much emphasis was given during the course to the Office of Current Intelligence. We believe this comment resulted from their failure to separate OCI's responsibility for current political reporting from its duties as the primary publisher of current national intelligence; intelligence OCI selects from the output of the entire Intelligence Community. Almost all the production offices make reference in their briefings to their contributions to the National Intelligence Daily and the President's Daily Brief, which are, of course, published through OCI.

There was also some feeling that more attention could be given in the course to the Directorate for Operations, specifically to problems and procedures that might affect the servicing of requirements.

### 4. Problems Encountered

The only administrative problem of consequence was the failure of a Trailways bus to arrive at Headquarters to transport the class to NSA at Fort Meade on 5 May. The bus was dispatched by Trailways according to the CIA Motor Pool, but had not shown up an hour after it was scheduled to arrive. We canceled the bus and the students formed car pools for the trip to NSA.

Thanks to excellent backup support from our training assistant, [redacted] the NSA training coordinator was contacted at the NSA reception office and was able to adjust the day's schedule to minimize the time lost.

The cost of POV transport, incidentally, proved to be considerably less than the charter bus would have cost. We do not recommend POV transport as a matter of course, however, and hope that Agency Blue Birds will be available for the next such trip, as they usually have been in the past.

CONFIDENTIAL

Approved For Release 2002/11/04 : CIA-RDP80-00503A000100070001-3

25X1A The denial of a visit to the National Military Command Center because of the strict new rules of the Joint Chiefs of Staff on admission to the Center left us with an open afternoon the last week of the course. We asked Bob [ ] of the Information Science Training Branch, FTD/OTR, to present a session for that afternoon on network analysis as an intelligence tool. The discussion of the technique produced a lively debate and provided a good prelude to the presentation on crisis management by [ ] of the Intelligence Community Staff on the final day of the course.

25X1A

##### 5. Results of Changes and Innovations

New presentations that were added to the course are discussed below in the order they appeared in the schedule:

- 25X1A -- [ ] Collection Guidance and Assessment Staff/DDI and a member of the previous IPC class, presented an effective briefing on the ins and outs of the requirements process, particularly as applied to requests for imagery.
- 25X1A -- We introduced a session on the use of simulation models for identifying collection requirements on the third day of the course. Although this presentation by [ ] received mixed appraisals from the class, we believe it was useful in illustrating new ways the Agency is exploring to identify its problems and goals.
- The film "Who Owns the Seas?" worked out well in highlighting types of new intelligence problems that are highly complex and multidisciplinary in scope. The film related well to the visit to the Office of Geographic and Cartographic Research which came later in the course.
- A session on information handling and intelligence presentation in the future went over reasonably well in its first presentation. We think that this view into intelligence work in the relatively near future--presented jointly by DDS&T's Center for the Development of Analytical Methodologies and OCI's Methods and Technologies Staff--can be a useful feature of the course.

CONFIDENTIAL

CONFIDENTIAL

Approved For Release 2002/11/04 : CIA-RDP80-00503A000100070001-3

25X1A -- [ ] Director of the Strategic Warning Staff, presented a balanced portrayal of this small but important staff and where it fits into the intelligence process. It was well to remind the students of the number one intelligence priority.

#### 6. Future Changes and Innovations

After three sessions, the Intelligence Process Course appears to be covering its subject matter and objectives quite thoroughly.

11 A briefing on classification and compartmentation that was introduced in the previous class continues to have problems, and was critically commented on by a number of students. In this case the briefer was probably too senior and gave a broad managerial overview when we needed a nuts-and-bolts approach. We plan to revise this briefing considerably for the next session of the course. It is obvious to us that considerable confusion exists in the minds of the students over the meaning and importance of caveats and code words governing the use of information reports and finished intelligence.

We also plan to explore over the summer whether there is an appropriate place in the IPC for an Intelligence Community Staff presentation. At the moment, our thinking envisages a briefing from the Production, Assessment, and Improvement Division of the Office of Performance, Evaluation, and Improvement. We contemplate a session that would go into how this division goes about assessing and evaluating intelligence production, relying on the case study approach to see how consumer comment on the product is obtained. We do not want to get a broad general briefing on Agency successes and failures.

#### 7. Student Concerns

The only concern expressed by the students worthy of note was a continuing stress by a few of the Career Trainees on their cover. This is a legitimate concern, but few of the newly hired trainees appeared to have a good understanding of the realities of cover, the philosophy of plausible denial, or the fact that many of them will be known as Agency employees to host services overseas. Most of the CTs adjusted to the necessity of riding the Agency's

well known Blue Bird buses for visits to other offices of the Agency and to other NFIB agencies. Several expressed continuing concern, however, about other agencies receiving and handling of security clearance rosters that had to be sent through Office of Security channels prior to class visits.

A compendium of class statistics is located at Tab E.

### COURSE OBJECTIVES

Upon completion of the Intelligence Process Course the student will:

- Have a basic knowledge of the intelligence process and the interaction that occurs among its several components: intelligence objectives; requirements; sources of collection; processing, storage, and retrieval of information; analysis; production; and presentation.
- Understand the contribution of intelligence to decision-making at the executive level and to supporting the executive level in carrying out national policies.
- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the Intelligence Community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

#### COURSE METHODS

1. Intelligence specialists from within CIA and from other agencies within the Intelligence Community will give presentations to the class. Assigned reading and motion pictures will be used to prepare students for the presentations or to enlarge on the scope of the presentations.

2. Analysts from CIA and other intelligence agencies will conduct discussions and panels with class participation. Working analysts will use case studies to examine the intelligence process in operation. In presenting these case studies, the analysts will consider tasking, research, analytical techniques, coordination, and methods of presentation.

3. Members of the class will perform a number of exercises that reinforce their understanding of classroom lecture/demonstrations on presentation skills and problems.

4. The class will visit several intelligence facilities in the Washington area to observe collection, processing, analytic, and presentation activities. Attention will be given to examining methodologies developed by components of the Intelligence Community to meet particular collection and analytic needs.

INTELLIGENCE PROCESS COURSE #3-76  
19 April - 21 May 1976

Monday, 19 April

Room 912, C of C

0845-1000 Course Introduction

- Administrative Affairs
- Presentations and Introductions
- Class Members' Profiles and Interest Inventory
- Security Arrangements
- Overview and Requirements

Tuesday, 20 April

Room 912, G of C

0900-0930 Film: The Blackbirds Are Flying

*The background and development of the SR-71 reconnaissance aircraft.*

0930-1030 Directed Reading:  
-Intelligence for Policy Chiefs,

25X1A

-CIA Intelligence Support for Foreign and National Security Policy Making

1030-1130 Film: A Point in Time

*This film traces the development of today's overhead reconnaissance systems.*

25X1A

1130-1300 Special Imagery Briefing/  
Classification and Compartmentation

*A brief review of compartmented clearances, what they mean, when they are applied, and how restrictions can be removed to enable the widest possible exploitation of information.*

Chief, Liaison and Control Group, Collection Guidance and Assessments Staff/DDI

1300-1400 LUNCH

25X1A

1400-1530 Requirements

*The establishment of collection goals and work priorities for both collectors and analysts is one of the most important and frustrating tasks of resource managers. During this session the formal and informal structures for determining what to collect will be explored. Special emphasis will be given the Committee on Imagery Requirements and Exploitation-(COMIREX).*

Intelligence Process Course -- Evaluation Form

Name \_\_\_\_\_ (Optional)

You will recall there are four principal objectives of the IPC. Now that you have completed the course, you should:

- Have a basic knowledge of the intelligence process and the interaction that occurs among its several components: intelligence objectives; requirements; sources of collection; processing, storage, and retrieval of information; analysis; production; and presentation.
- Understand the contribution of intelligence to decision-making at the executive level and to supporting the executive level in carrying out national policies.
- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the intelligence community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

The IPC undergoes continuous review and modification to achieve maximum utility, and any comments you make -- especially constructive suggestions for improvement -- will be valuable to us in designing the next course. (Use additional paper, if necessary, and do not feel confined to these specific questions; if you wish to discuss any relevant topic, feel free.)

1. Please indicate on the scale below the degree to which the IPC as a whole met its stated objectives:

<u>Slight</u>						<u>Highly Satisfactory</u>
1	2	3	4	5	6	7

2. Identify the most effective or valuable presentations, visits or exercises in the course and explain why.

3. Identify the least effective presentations, visits or exercises and explain why.

4. Please comment on course focus and balance. That is, was proper time devoted to each topic? Were some overdone at the expense of others? Are there any general topics you believe to be pertinent to this class which were not included at all?

- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the intelligence community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

The IPC undergoes continuous review and modification to achieve maximum utility, and any comments you make -- especially constructive suggestions for improvement -- will be valuable to us in designing the next course. (Use additional paper, if necessary, and do not feel confined to these specific questions; if you wish to discuss any relevant topic, feel free.)

1. Please indicate on the scale below the degree to which the IPC as a whole met its stated objectives:

ILLEGIB

Approved For Release 2002/11/04 : CIA-RDP80-00503A000100070001-3

Intelligence Process Course -- Evaluation Form

Name  (Optional)

STATINTL

You will recall there are four principal objectives of the IPC. Now that you have completed the course, you should:

- Have a basic knowledge of the intelligence process and the interaction that occurs among its several components: intelligence objectives; requirements; sources of collection; processing, storage, and retrieval of information; analysis; production; and presentation.
- Understand the contribution of intelligence to decision-making at the executive level and to supporting the executive level in carrying out national policies.
- Be familiar with the scope of intelligence research and the broad range of analytic methods developed within and used by the Agency and other members of the intelligence community to produce finished national intelligence.
- Be conversant with the variety of intelligence publications and production methods that are used to meet the requirements of foreign intelligence consumers.

The IPC undergoes continuous review and modification to achieve maximum utility, and any comments you make -- especially constructive suggestions for improvement -- will be valuable to us in designing the next course.
